

Environmental Engineering and Project Management

Assessing and characterizing environmental impact quickly and accurately are often key components to cost effective remediation and successful site closures. Hurvitz Environmental and our professionals understand this concept and apply our extensive experience in environmental assessment, investigation and remediation to strategically and cost effectively characterize and mitigate site contamination. We only employ proven remediation designs and our site closure strategies are successful.

Our Environmental Engineering and Project Management Services include:

ASSESSMENTS

- Phase I Environmental Site Assessments
- Phase II Environmental Site Investigations
- Phase III Environmental Remediation Design and Implementation
- Geologic Evaluations

ENVIRONMENTAL PROJECT MANAGEMENT

- Oversee and Implement Environmental & Geological Investigations
- Collect and Interpret Soil, Groundwater and Soil Vapor Data
- Develop Site Conceptual Models
- Fate and Transport Modeling
- Feasibility Studies
- Corrective Action Plans

ENVIRONMENTAL ENGINEERING AND SITE REMEDIATION

- Soil Vapor Extraction
- Dual Phase Extraction
- Soil Excavation
- Air Stripping
- Air Sparging
- Ozone & Peroxide Injection
- Bioremediation
- Groundwater Barriers
- Reductive Dechlorination
